

WALI AHMAD HOTAK

Peshawar, Pakistan · github.com/WaliAhmad-git · [LinkedIn: Wali Ahmad Hotak](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

A computer scientist with hands-on experience in full-stack web development, machine learning, and cybersecurity. Proficient in Python, FastAPI, PostgreSQL, and Vanilla JS, with a demonstrated ability to deliver production-grade software under real-world constraints. Fluent English communicator seeking junior developer opportunities in cybersecurity or web development.

TECHNICAL SKILLS

Languages: Python, JavaScript (Vanilla), PHP, SQL, Bash, HTML/CSS

Frameworks: FastAPI, SQLAlchemy 2.0, Pydantic v2, Node.js, Next.js, Tailwind CSS

Databases: PostgreSQL, SQLite

ML / AI: Scikit-learn, NumPy, Pandas, SMOTE, Logistic Regression, SVM, Decision Trees, KNN, Ensemble Methods

Cybersecurity: nmap, sqlmap, dirb, hping3, Kali Linux (KVM/QEMU), Metasploitable 2 lab

Tools & DevOps: Git / GitHub, Linux / Fedora, VS Code, Figma, Ollama, Playwright, LaTeX / Overleaf, Pandoc, ReportLab

Other: PipeWire, OBS WebSocket, Gemini API, Deepgram STT, edge-tts, virt-manager / KVM

EXPERIENCE

Founder & Entrepreneur — Amirani Store 2024 – 2026

E-commerce · Peshawar → Belgium (International Shipping)

- Founded and ran Amirani Store, an e-commerce brand selling ready-made and custom-tailored Afghan clothing, before selling the business in early 2026.
- Managed social media-driven marketing, order fulfilment (~15–20 orders/month), and international shipping logistics to Belgium.

Thumbnail Designer — Fiverr 2019

Freelance · Remote

- Provided freelance thumbnail design services to international clients on the Fiverr platform.

Amazon Virtual Assistant 2020

Freelance · Remote

- Assisted Amazon sellers with product research, listing management, and administrative tasks.

PROJECTS

Personal Developer Portfolio 2026

Personal Project · Next.js 14 + Tailwind CSS + Framer Motion · Deployed on Vercel

- Designed and built a multi-page personal portfolio with a terminal/security aesthetic, featuring animated hero sections, project showcases, and a skills page.
- Implemented security hardening: CSP/HSTS headers, rate-limited contact API, and server-side form handling.
- Live at: waliahmadhotak.vercel.app

Full-Stack POS System — Makkah Foods 2025

Personal / Freelance Project · Remote

- Designed and built a 6-module Point-of-Sale system: billing, product management, inventory, staff, reports, and settings.
- Backend: Python 3.12 + FastAPI + SQLAlchemy ORM + PostgreSQL 18; Frontend: Vanilla HTML/CSS/JS.

- Implemented JWT authentication (HS256), bcrypt password hashing, soft deletes, and role-based access control.
- Built 9 RESTful reporting endpoints with pure-JS canvas charts; integrated cron-based automated DB backups.

Z Avatar & Note-Taker 2025

Personal Project · Fedora Linux

- Built a Google Meet presence bot using Deepgram STT, Gemini API for Q&A and live note generation, and edge-tts for voice output.
- Configured PipeWire virtual mic (null-sink + remap-source) and OBS WebSocket for scene switching.
- Integrated Gemini Files API with chunked .mp4 uploads for continuous lecture transcription (max 65K output tokens).

Z Context Switcher — Chrome Extension 2026

Personal Project · Chrome Extension (Manifest V3)

- Designed a Chrome extension to solve context loss in long AI conversations, featuring no-line-limit summarization and a dual engine (offline algorithmic + optional Gemini API).
- Built proactive non-dismissable warnings at 75% token capacity and auto-inject summaries into new tabs on context limit.
- Implemented a preview-before-inject feature showing summary, token count, and edit/inject controls before sending.

Amirani Store MVP — Afghan Garments E-commerce 2026

Portfolio Project · Next.js 14 + Tailwind + Zustand + Framer Motion

- Rebuilt the Amirani Store as a static MVP to demonstrate a full custom order flow for GitHub portfolio.
- Implemented Afghan-themed Tailwind design tokens, a multi-step MeasurementForm with annotated measurement guide PNG, and Zustand-based cart state.

Seizure Prediction ML Research 2025

IMSciences — Machine Learning Course · Peshawar, Pakistan

- Built an EEG-based seizure prediction model across three public datasets (UCI Epileptic Seizure, EEG Brainwave Emotions, EEG Eye State).
- Applied SMOTE, undersampling, and class weighting to handle severe class imbalance; best result: Pipeline B + Elastic Net + Class Weighting.
- Produced an IEEE-format PDF report, 10-slide PPTX, and reproducible Python code (Google Colab).

Real Estate AI Search Platform 2025

IMSciences — Database Course Project (Team of 3)

- Co-developed a virtual property dealer app enabling users to search houses, view listings, and contact owners.
- Fine-tuned a HuggingFace transformer model on property data to power an in-app Q&A chatbot and personalized recommendations.
- Stack: Python backend with a relational database; Flutter (Dart) frontend for cross-platform mobile UI.

Text-to-Braille Converter 2024

IMSciences — Digital Logic Design Course Project (Team of 6)

- Designed and built a hardware-based text-to-Braille translation device using Arduino, solenoids, wires, and resistors.
- Programmed in Arduino IDE (C/C++) to drive solenoid actuation, converting text input into physical Braille output character-by-character.

CERTIFICATIONS

- SDC Diploma in English — Kabul English Language Center (KELC), University Town, Peshawar · Advanced Proficiency
- Microsoft Word Certification — Coursera (2023)
- Microsoft Excel Certification — Coursera (2023)

EDUCATION

BSc Computer Science (BSCS) 2023 – 2027

IMSciences (Institute of Management Sciences) · Peshawar, Pakistan
